Experience

eTool Developers LLC – *Front-end Developer and Designer*

Worked closely with team and clients to create modern websites and applications using best practices. Built sites using custom in-house ERP and CMS. Responsibilities included full-stack development, user experience, as well as lead designer and lead front-end developer. Worked primarily with large e-commerce clients, with an attention to SEO, mobile, analytics, marketing campaigns, and business strategy.

Yourareacode LLC – *Front-end Developer*

Daily responsibilities included website builds which integrated dashboard and CRM services. Managed client requests, site maintenance, and updates. Worked closely with graphic designer to take PSDs to fully functioning builds. Special projects included working with backend programmer to update modules and create a new fully responsive base for builds. Managed over 700 client sites and fast paced ticket bin.

Facilities Management - *Web Developer/Designer*

Worked on ASP.NET site, updating and unifying style across various department pages. Edited and improved content, cleaned up code, introduced best practices. Created the Recycling and Go Green sites.

CM-Life Newspaper - *Web Editor/Redesign*

Managed, prepared and optimized media for the website. Updated website with each new publication using their 3rd party CMS. Redesigned major portions of their website, as well as assisting in other multimedia projects. Basic editorial duties included checking work before publishing. Worked with an emphasis on SEO, print style page design.

CMU IT Department - *Junior Web Developer*

Created and maintained pages for various University departments. Worked with backend ASP.NET developers. Created PSD mockups, which eventually became full web pages.
